

PA FFA Wildlife Career Development Event

Chairperson Information

CDE Chairperson	Gretchen Dingman and Gage McCabe
Email	gad@tvdawgs.net & gmccabe@smasd.org
Best Contact Number	570-660-6800 & 717-216-7608
Contest Date/Times	Tuesday, dismissed from the Orientation session to CDE, and Wednesday, 8 am
Contest Location	Osmond Building
CDE Review Time	If there are questions, please call my cell or email me.
CDE Review Location	N/A

Basic In-Person CDE Guidelines

Event Type: Individual/Team	# of Team Members: 0
<u>Individual Materials List</u> • 2 - #2 Pencils and Eraser • Clipboard • Global Positioning System (GPS): The minimum requirements for GPS will be the Garmin eTrex receiver or a compatible. Position accuracy WAAS enabled three meters, 20 routes	<u>Group Materials List</u> • N/A
<u>Attire</u> • Official Dress both days	<u>CDE At-A-Glance (List of major components)</u> • Tuesday – Day 1: Wildlife Test, Environmental Analysis & GPS Practicum • • Wednesday – Day 2; Bird ID, Mammal ID, Bird Call ID, Foods ID, Wildlife Tracks, Non-Native / Introduced Species ID, and Wildlife Signs ID.
<u>Pre-State CDE Expectations</u> • All students with an interest in PA Wildlife are encouraged to participate.	
<u>CDE Changes from Previous Years?</u> • Career informational Station on Wednesday will focus on careers in the PA Game Commission and the PA Forestry Sponsor Group.	

CDE Rules

CDE Component	Points	Component Description
Wildlife Test	100	This part includes 50 comprehensive questions on wildlife conservation and management.
Bird Identification	40	Students will identify 40 different birds found in Pennsylvania.
Foods Identification	20	Students will identify 20 different foods that Pennsylvania wildlife commonly eat.
Wildlife Signs	20	Students will identify 20 different signs of wildlife
Mammal Identification	20	Students will identify 20 different mammals found in Pennsylvania.
Bird Calls	20	Students will identify 20 different bird calls from birds in Pennsylvania. At state CDE, the Merlin app will be used, and bird songs will mostly be used for identification.
Wildlife Tracks	20	Students will identify 20 different wildlife tracks
Environmental Analysis	40	Students will complete an environmental analysis, identifying wildlife species, non-living components, construct a food web, identify the stage of succession, and determine if this is a suitable habitat – why or why not.
Non-native / introduced species	20	Students will identify 20 introduced / non-native species.
GPS Practicum	40	Participants will utilize the global positioning system (GPS) unit to complete one or more of the following: • Use a GPS unit to identify the coordinates of various locations utilizing various coordinate systems and datums. • Use a GPS unit to identify boundaries of a given area, including the calculation of land area and perimeter of the boundary. (Note: Relative area/perimeter formulas may be provided by event staff.) • Use a GPS unit and topographic map to layout the location of the fence line, pond, drainage structure, or other related facilities. • Use a GPS unit to mark the location of a path or road through a given area. • Use a GPS unit to navigate to a given set of coordinates and measure linear distance between various points.

Causes for Disqualification: Cheating and any other rule specified by the PA FFA that apply to all CDE's.

Tie-breaker: Bird calls, then the wildlife test, then food identification if needed.
